NOW

2004 to 2023

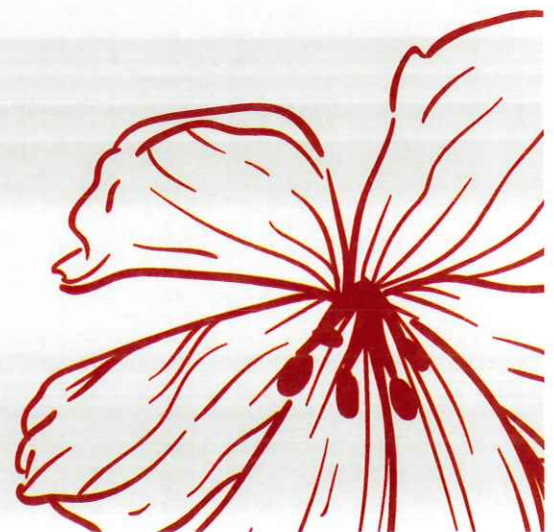

FASHION

Fashion in 2004 was defined as comfortable and casual styles. One of the most iconic fashion trends of 2004 were low rise jeans and they were often paired with baby tees.

Another trend that emerged during 2004 was the Trucker Hats. The hats were originally worn by Ashton Kutcher and Pharrell Williams often paired with a graphic tee and jeans for a casual yet trendy look.

Since 2004, fast fashion brands like Zara, H&M, and Forever 21 have made trendy clothing more accessible and affordable than ever before. This has led to a culture of disposable fashion, where people buy cheap clothing, wear them a few times, then throw them away.

Another major change is the rise in streetwear. Brands like Supreme and Off-White have blurred the lines between high fashion and streetwear, creating a new style that combines luxury with casual, athletic inspired clothing. Overall, fashion has changed a lot since 2004.

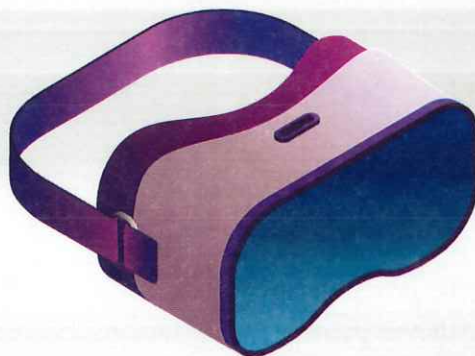

TECHNOLOGY

Since 2004, technology has dramatically changed. In 2004, Smartphones were just starting out and social media was still at its infancy. Today, technology is a significant part of our lives and its hard to imagine life without it.

Facebook was founded in 2004 which significantly changed the way we communicate with our near and loved ones around the globe. Now in 2023, we have Iphones, Ipads, facial recognition, 3D printing, Uber, Instagram, Snapchat, self driving cars, virtual relaiity, and so much more.

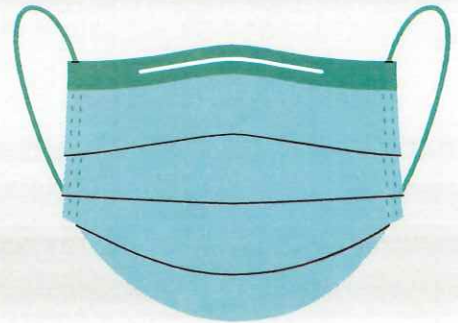

ECONOMIC CHANGES

Our economy has gone through many changes since 2004. Some major events like the 2008 financial crisis, and the COVID-19 pandemic. These events had a significant impact on businesses, employment, and consumer spending.

There has also been changes in technology, trade policies, and government regulations that have impacted the economy. However, our generation has proven to be resilient and found a way to thrive despite the circumstances!
